💼 Work Experiences

August 2021 - Present

Lead Web Engineer, Full Stack Developer

Gymscanner (https://gymscanner.com)   📍 Delaware City, USA

My involvement as a Full Stack Developer :

- Developed and maintained multiple web applications using Laravel and VueJs
- Utilized Laravel Eloquent and MySQL to manage database operations and perform complex queries
- Implemented responsive and user-friendly interfaces using TailwindCSS and Bootstrap
- Utilized Laravel Livewire and InertiaJs to build dynamic and interactive experiences
- Managed version control using Git

April 2020 - Present

Freelancer

Fiverr, Upwork

My involvement as a Freelancer :

- Worked on a variety of web development projects using Laravel and VueJs
- Utilized Laravel Eloquent and MySQL to manage database operations and perform complex queries
- Implemented responsive and user-friendly interfaces using TailwindCSS and Bootstrap
- Utilized Laravel Livewire and InertiaJs to build dynamic and interactive experiences
- Managed version control using Git

February 2020 - July 2021

Web Developer

Ontik Technology (https://ontiktechnology.com)   📍 Gulshan, Dhaka

My involvement as a Full Stack Developer :

- Developed and maintained multiple web applications using Laravel and VueJs
- Utilized Laravel Eloquent and MySQL to manage database operations and perform complex queries
- Implemented responsive and user-friendly interfaces using TailwindCSS and Bootstrap
- Utilized Laravel Livewire and InertiaJs to build dynamic and interactive experiences
- Managed version control using Git

📁 Skills

Technical Skill

- **Laravel:** Experienced in building web applications using the Laravel framework. Proficient in implementing controllers, routes, views, and models, and comfortable with Laravel's MVC architecture.
- **Laravel Livewire:** Experienced in using Laravel Livewire to build dynamic and interactive experiences without writing JavaScript. Proficient in implementing Livewire components, handling events, and implementing reactive data binding.
- **VueJs:** Skilled in building interactive and dynamic user interfaces using VueJs. Proficient in implementing Vue components, handling events, and implementing reactive data binding.
- **InertiaJs:** Skilled in using InertiaJs to build full-stack single-page applications (SPAs) using Laravel and VueJs. Proficient in implementing Inertia controllers and routes, and comfortable with Inertia's API-based architecture.
- **AlpineJs:** Proficient in using AlpineJs to build lightweight and interactive user interfaces. Skilled in implementing Alpine directives and handling events.
- **VanillaJs:** Experienced in using VanillaJs to build web applications and manipulate the DOM. Proficient in implementing event listeners, handling events, and manipulating DOM elements.
- **TailwindCSS:** Skilled in using TailwindCSS to build responsive and user-friendly interfaces. Proficient in implementing layout, text, background, and other styles using Tailwind's utility-based approach.
- **Bootstrap:** Experienced in using Bootstrap to build responsive and mobile-first interfaces. Proficient in implementing layout, text, background, and other styles using Bootstrap's grid system and pre-designed components.
- **Laravel Eloquent:** Experienced in using Laravel Eloquent to manage database operations and perform complex queries. Proficient in implementing Eloquent models and relationships, and comfortable with Eloquent's ORM architecture.
- **MySQL:** Skilled in using MySQL to design and implement database schemas, and perform CRUD operations. Proficient in implementing MySQL queries, indexes, and constraints.
- **Git:** Experienced in using Git for version control. Proficient in implementing Git commands and workflows, and comfortable with Git's branching and merging model
