PROFILE

Six years of building web applications in Laravel — five of them leading the web stack at Gymscanner, a global gym and trainer booking platform. Laravel and Livewire on the server, Vue and Inertia where the page needs to think for itself.

Open to offers — Lead Web Engineer at Gymscanner · happy where I am, but listening

EXPERIENCE

Lead Web Engineer · Gymscanner

Aug 2021 — Present

Remote · Remote · Full-time · 5 yrs 1 mo

Lead the web stack for a global platform that lets people book gym memberships, tourist passes and personal training sessions across a hundred-plus cities. Laravel on the server, Livewire and Vue on the front, working with a team spread across the US, Kuwait and Romania.

- Own the web application end to end — schema, application code, interface and release
- Built the booking and listing flows used by both sides of the marketplace: people looking for a gym, and the gyms and trainers selling access
- Keep the codebase current across successive Laravel, Livewire and Filament major versions rather than letting it calcify
- Work asynchronously across a UTC-5 to UTC+6 spread, which puts the burden on written decisions rather than meetings

STACK Laravel · Livewire · Filament · Vue · Inertia · Alpine.js · Tailwind CSS · MySQL · Eloquent · Git

Web Developer · Ontik Technology

Feb 2020 — Jul 2021

Gulshan, Dhaka, Bangladesh · Full-time · 1 yr 6 mos

First full-time engineering role. Built client web applications on a Laravel and Vue stack, in an office where the feedback loop was short and the deadlines were someone else's.

- Delivered client applications on Laravel with Vue and Blade front-ends
- Learned the framework properly — Eloquent, queues, validation, auth — on projects that had to actually work
- Moved from writing features to owning them through review, deploy and the bug reports that followed

STACK Laravel · Vue · Blade · Bootstrap · MySQL · jQuery · Git

Freelance Web Developer · Fiverr

Apr 2020 — Present

Remote · Remote · Freelance · 6 yrs 5 mos

Ongoing freelance work alongside the day job. Laravel applications, Vue front-ends and the unglamorous maintenance jobs — upgrades, bug hunts and features bolted onto codebases someone else wrote.

- Scope, quote, build and hand over projects solo, including the parts that are not code
- Work directly with non-technical clients, which is its own skill and mostly consists of asking better questions
- Maintain a rating good enough that most work now arrives through repeat clients

STACK Laravel · Livewire · Vue · Tailwind CSS · Bootstrap · MySQL

SKILLS

LANGUAGES	PHP · SQL · JavaScript · TypeScript · HTML & CSS
FRAMEWORKS	Laravel · Livewire · Filament · Inertia · Vue · Alpine.js · Nuxt · Tailwind CSS · Bootstrap · Pest
DATA STORES	MySQL · Eloquent ORM · SQLite
INFRASTRUCTURE	GitHub Actions · Vercel · Netlify · GitHub Pages
TOOLING	Git · Composer · Vite · Laravel Pint · Figma

EDUCATION

BSc, Computer Science and Engineering

Aug 2020 – Sept 2024

Northern University Bangladesh · Dhaka, Bangladesh

Final project: Aurora: verifying product authenticity through per-unit serial numbers and a QR-backed chain of custody

Diploma In Engineering, Computer Science and Technology

Aug 2014 – Jan 2019

Feni Computer Institute · Feni, Bangladesh

Final project: A multi-vendor e-commerce platform — seller accounts, per-seller catalogues and a shared checkout

CERTIFICATIONS

- AWS Certified Solutions Architect — Associate — Amazon Web Services, Mar 2024
- Laravel Certified Developer — Laravel, Aug 2023
- HashiCorp Certified: Terraform Associate — HashiCorp, Oct 2024

SPEAKING

- “Idempotency is a product feature” — Laracon EU, 11 Feb 2026
- “Debugging queues you cannot see” — PHP Dhaka Meetup, 6 Sept 2025
- “Event sourcing without the framework” — Laravel Worldwide Meetup, 22 Apr 2025
