PROFILE

Seven years of shipping Laravel applications for fintech and logistics teams — queues, billing, multi-tenancy and the observability that stops a 3 a.m. page. Currently building Pulsecheck, an uptime and dependency monitor for PHP teams.

Open to senior backend roles — Available from September 2026 · full-time or contract

EXPERIENCE

Backend Lead · Meridian Freight

Feb 2023 — Jun 2026

Singapore · Remote · Full-time · 3 yrs 5 mos

Led backend architecture for a multi-tenant logistics platform serving 400+ freight forwarders. Owned the event-sourced shipment core, the partner API, and the tenancy layer. Ran design reviews and mentored two mid-level engineers.

- Cut p95 API response time from 610ms to 140ms by rewriting projections to replay in parallel by aggregate
- Reduced projection rebuild time from 14 hours to 40 minutes, making read-model schema changes routine
- Automated tenant provisioning, dropping onboarding from one week of manual setup to under an hour
- Took webhook delivery success from 91% to 99.7% with a dedicated queue, exponential backoff and a dead-letter workflow
- Introduced ADRs and a weekly architecture review; both outlived my tenure

STACK Laravel · PHP 8.2 · MySQL 8 · Redis · Horizon · Elasticsearch · Livewire · AWS ECS · Terraform · Datadog

Senior Backend Engineer · Northgate Digital

Jan 2021 — Jan 2023

Dhaka, Bangladesh · Full-time · 2 yrs 1 mo

Product engineering for a fintech client portfolio. Split between building a double-entry billing engine and hardening existing Laravel applications that had outgrown their original architecture.

- Designed and shipped a double-entry billing engine handling \$3.4M/month with zero double-charge incidents in 18 months
- Reduced month-end close for the client finance team from three days to four hours
- Migrated four legacy applications from Laravel 6 to 9 with no customer-visible downtime
- Established Pest as the house test framework and lifted average coverage on new code from 34% to 81%

STACK Laravel · PHP 8.1 · Postgres · Stripe · Cashier · Pest · GitHub Actions · Docker

Full-stack Developer · Rivet Studio

Jun 2019 — Dec 2020

Dhaka, Bangladesh · Full-time · 1 yr 7 mos

Agency work: 20+ client projects across e-commerce, booking systems and internal tools. Learned to scope tightly, ship on fixed budgets, and hand off codebases someone else would maintain.

- Delivered 20+ Laravel projects across e-commerce, booking and internal tooling
- Built the studio's reusable Laravel starter kit, cutting project setup from three days to half a day
- Introduced deploy automation, replacing manual FTP releases with zero-downtime deploys via Envoyer

STACK Laravel · PHP 7.4 · MySQL · Vue 2 · Alpine.js · Bootstrap · Envoyer

Freelance PHP Developer · Independent

Mar 2018 – May 2019

Remote · Remote · Freelance · 1 yr 3 mos

Self-taught start: WordPress sites and small custom PHP applications for local businesses. This is where I learned that the hard part of software is the second year, not the first.

- Shipped 14 client sites solo, from scoping through hosting and handover
- Moved from raw PHP to Laravel after the third project taught me why frameworks exist

STACK PHP · WordPress · MySQL · jQuery · Laravel 5

SKILLS

LANGUAGES	PHP · SQL · TypeScript · JavaScript · Bash · Rust
FRAMEWORKS	Laravel · Livewire · Inertia · Vue 3 · Nuxt · Tailwind CSS · Pest
DATA STORES	Postgres · MySQL · Redis · Elasticsearch · SQLite
INFRASTRUCTURE	Docker · Terraform · AWS (ECS, RDS, S3) · GitHub Actions · Nginx · Laravel Forge
TOOLING	Git · Horizon · Datadog · OpenTelemetry · Figma

EDUCATION

BSc, Computer Science and Engineering

Jan 2015 – Apr 2019

BRAC University · Dhaka, Bangladesh · CGPA 3.71 / 4.00

Thesis: Adaptive rate limiting for shared multi-tenant APIs using sliding-window counters

Higher Secondary Certificate, Science

Jun 2012 – May 2014

Notre Dame College · Dhaka, Bangladesh · GPA 5.00 / 5.00

CERTIFICATIONS

- AWS Certified Solutions Architect — Associate — Amazon Web Services, Mar 2024
- Laravel Certified Developer — Laravel, Aug 2023
- HashiCorp Certified: Terraform Associate — HashiCorp, Oct 2024

SPEAKING

- “Idempotency is a product feature” — Laracon EU, 11 Feb 2026
- “Debugging queues you cannot see” — PHP Dhaka Meetup, 6 Sept 2025
- “Event sourcing without the framework” — Laravel Worldwide Meetup, 22 Apr 2025
